EDUCATION

Cornell University, *MEng in Computer Science*, Ithaca, NY Expected May 2027
Stevens Institute of Technology, *BS in Computer Science and Minor in Finance*, Hoboken, NJ | GPA: 3.83 May 2024

WORK & RESEARCH EXPERIENCE

Quantitative System Development Engineer Jul. 2025 – Jul. 2026
Yuanta Securities Taipei City, Taiwan

- **Built** a **.NET trading-monitoring application** for intraday operation and risk workflows, combining live-alerting tabs via **NATS + Protobuf** with **async state management** and on-demand data-fetching for securities lending costs, order books, and position lookups over **SQL Server**; reduced overhead by **~60–80%**
- **Engineered** a Python-based **market data pipeline** and alpha research infrastructure supporting thousands of Taiwan-listed equities and **10+ years** of tick-level data for strategy backtesting; built a **config-driven data registry** with **lazy loading** and **metadata-based caching**, reducing repeated data loading by **90%+**
- **Developed** a real-time, **multi-process** financial news scraping system in **Python** collecting **10,000+ articles/day** 24/7; stored content in **MongoDB**, generated vector embeddings via Ollama, and indexed into **Qdrant** for NLP research
- **Automated** daily trading workflows in **Python**, including after-market settlement, reporting, and pre-market information delivery, reducing manual prep time by **30–60 min/day**

Undergraduate Researcher Jun. 2023 – Dec. 2024
Stevens Institute of Technology Hoboken, NJ

- **Preprocessed** a large multimodal dataset with over 27 million rows using **Python**
- Designed and implemented a **pretrained model** using **TensorFlow**, significantly increasing usable data for model training
- **Authored** MPLite: Multi-Aspect Pretraining for Mining Clinical Health Records, **accepted at IEEE BigData 2024**
- **Collaborated** with professor and PhD students, providing regular research updates and fostering effective communication

Course Assistant Sep. 2022 – Dec. 2022
Stevens Institute of Technology Hoboken, NJ

- **Guided** students with coding assignments in **C programming language**
- Enhanced course engagement by fostering **effective communication** between professors and students

SIDE PROJECTS

Web Development Oct. 2023 – May 2024

- Designed and developed an **interactive e-commerce website** using **CSS**, **JavaScript**, and **HTML**
- Developed **RESTful APIs** to handle product listings, user authentication, and order processing
- Utilized **Git** for **version control**, ensuring smooth team collaboration and iterative improvement

Spam Filtering Recommendation Modeling Jan. 2024 – Feb. 2024

- **Preprocessed** texts with NLP techniques in **Python**, and transformed texts into **TF-IDF embeddings** for **model training**
- Implemented **logistic regression** classifier with mini-batch gradient descent to detect spam texts
- **Provided** spam filtering rules based on model predictions, reducing spam message incidence by **15%**

TECHNICAL SKILLS

Technical Skills: Python, C#, Java, JavaScript, .NET, Node.js, React, Docker, Git, Selenium, Jira, MongoDB, SQL Server, PostgreSQL
